

HTTP/1.1	HTTP/2
It works on the textual format.	It works on the binary protocol.
There is head of line blocking that blocks all the requests behind it until it doesn't get its all resources.	It allows multiplexing so one TCP connection is required for multiple requests.
It uses requests resource Inlining for use	It uses PUSH frame by server that collects all multiple pages

getting multiple

**It compresses
data by itself.**

**It uses HPACK
for data
compression.**
